

Aquaculture Aeration

Best Aeration Equipment in the Industry

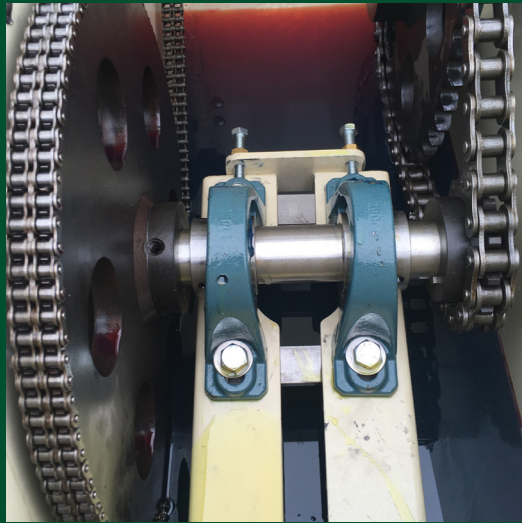

Over 30 year's experience in Aquaculture Aeration Products

Our aerators produce more oxygen with less horsepower to save energy costs and to increase more yields per acre.

Direct-Drive Aerators

Chain-Drive Aerators

Portable Aerators

Developed to offer even less need for maintenance; the House **Direct-Drive** eliminates the belts and side-load forces on the input-shaft of the gear reducer. We offer TGIC powder-coated, galvanized coated and stainless steel models.

Available in 2, 3, 5, 7.5, 10 & 15 HP

A favorite from its first year, the House **Chain-Drive** works long and hard to aerate your fish pond. The new latch top cover allows for easy access for routine maintenance. We offer TGIC powder-coated, galvanized coated and stainless steel models.

Available in 2, 3, 5, 7.5, 10 & 15 HP

Diesel-Engine or PTO Driven Portable Aerators are very efficient and effective ways to aerate your ponds. We offer both portable paddlewheel and sidewheel models that are available in TGIC powder-coated, galvanized coated and stainless steel models.

Our employees are dedicated to produce the best aeration equipment in the industry.

With years of product design and testing, we have optimized oxygen transfer and mixing. Certified oxygen transfer and mixing tests are available.

Between our 99,000 sq. ft. manufacturing facility with an extensive warehouse in Cherry Valley, AR & our branch in Inverness, MS, we can take care of all of our customer needs. Our customer service is the best in the industry with over 60 years of combined field service experience.

Manufacturing Plant • 870.588.3773
