

TORQUE-ARM®

RENEWAL PARTS

FACTORY PACKAGED REBUILD KITS FOR TDT, TXT, SCXT & TORQUE-ARM II REDUCERS

DODGE TORQUE-ARM REDUCER PROTECTION PLAN

- LUBEKIT info expanded to include Hydroil & SCXT
- Rebuild Kits for all current sizes
- Gear lube kits
- Touch-up factory original paint

DODGE TORQUE-ARM reducers are designed to achieve optimum service life from all components. Wear does occur over the service life of a reducer, particularly to bearings and seals. To rebuild DODGE TORQUE-ARM reducers to factory tolerances and specifications, use only genuine DODGE replacement parts.

DODGE TORQUE-ARM Level 1 and Level 2 Rebuild Kits provide on-site inventory for preventive actions such as scheduled maintenance. They also provide protection for equipment breakdowns and minimize the cost of down time. Having replacement parts available before they are needed contributes to a quick return of the machine to productivity.

Unexpected machine down time usually means loss of productivity. Consider:

- Time to diagnose and order replacement parts
- Time waiting for parts to arrive

Each Rebuild Kit is assigned a unique part number based on reducer size and ratio making selection easy. Kit components are packaged individually and marked for easy identification. Individual components are then over packed and shipped in one clearly marked container that can be dedicated to a specific reducer.

DODGE Rebuild Kits offer protection and economy. Pricing is structured to offer savings over the purchase of individual components.

Level 1 Kit Includes:

- Input & output sealst
- Complete set of bearings
- Shim kit
- Gearcase Sealant
- Instruction Manual

Level 2 Kit Includes:

- 1st stage input shaft with pinion
- 1st stage mating gear
- Input & output seals
- Complete set of bearings
- Shim kit
- Gearcase sealant
- Instruction manual

REBUILD KIT ACCESSORIES AVAILABLE FOR ORDER (not included in kit)

Lubricant:

It is important that a reducer be refilled with fresh lubricant of the proper viscosity group following service. To make this an easy selection we have prepackaged the required volume of factory standard lubricant which may be ordered along with the rebuild kit. See DODGE TORQUE-ARM Lube Kits on back page of this flyer.

Paint – Touch Up

To restore damaged paint following the rebuild you may order DODGE part number 810001 on PTPlace. This is a 12 oz aerosol spray can of factory original Reliance Blue-Green Enamel. See Touch Up Aerosol Spray Paint on back page of this flyer.

DODGE TDT-TXT-SCXT TORQUE ARM REBUILD KITS

Level 1 Kit includes input and output seals, set of bearings, shim kit, sealant and instruction manual. Kit provides protection against down time due to fatigue of high wear components.

Level 2 Kit includes all items in Level 1 along with input pinion and 1st stage gear. Level 2 kit provides maximum protection against down time.

Rebuild kits available for all current sizes as listed below. For older, obsolete sizes not listed it is recommended that seal kit, bearing kit and shim kit be ordered for Level 1 coverage. Add input pinion and gear for Level 2 protection.

TORQUE-ARM II REBUILD KITS

Level 1 Kit includes input and output seals, aux seals, set of bearings, shim set, housing sealant and instruction manual. Kit provides protection against down time due to fatigue of high wear components.

Level 2 Kit includes all items in Level 1 Kit plus high speed input pinion and mating 1st stage gear. Provides maximum protection against down time. Part number is level 1 kit + ratio.
